

**July 13, 2016 10:00 -11:00 am**

**Conference Call between EPA R10 NPDES Permits Unit and Ecology Central  
Regional Office Water Quality Program on the Draft Leavenworth National Fish  
Hatchery NPDES Permit in Development**

Topics for Discussion:

1. Designating an Ecology Point of Contact for the 401 WQ certification of the EPA Issued LNFH NPDES Permit.
2. Walk Through Current Draft Language
  - a) Implications of withdrawal of 2010 Cert
    - i. Sediment monitoring was proposed earlier – is it still an issue?
  - b) Thoughts on DO monitoring based on data from the facility
  - c) Draft Compliance Schedules for Temperature and Phosphorus
    - State approval of design plans
    - Phosphorus limits and timeline
    - Temperature limits and timeline
3. Permit development timeline – estimate for requesting 401 Cert, steps that happen before/after EPA receives 401 Cert
4. Other Questions?
